

For sale is a 2006 built Zero 650 with sail number 770. The boat has just had an extensive refit and is in very good condition. This Mini has not sailed a single Mini Transat and has only been used as a fun boat. The hull has been repainted and the underwater hull completely rebuilt. The ropes have been replaced with high quality Dyneema lines and all deck equipment has been serviced and renewed. All in all, the boat is ready to sail and can go straight into the water. At the moment the boat is in a hall in Bad Salzuflen with the keel dismantled and can be inspected at any time. The keel can be mounted by us on site or the boat can be picked up with a car trailer without keel.

For the transport with mounted keel a trailer can be borrowed from us until the beginning of April.
